

Marine & Boating Machining Services

Rodmatic Limited has the ability to become a business partner and perform contract machining services for the marine and associated boating industry using high technology CNC equipment for small quantities of 20 or so against a short delivery schedule up to continuous volume production.

Rodmatic Limited employs 55 people at Reading, Berkshire.

Following investment in the latest machining technology and support systems, we have secured contracts involving hydraulic valves, housings, pumps, seals, caps, connectors, pulleys, complex shafts and fittings produced in materials as diverse as stainless steel, brass and plastics.

With the installed capacity and experience in machining technology, we have the capability to produce a wide range of marine components for compressor turbines, electric and hydraulic bow thrusters, winch and rigging elements in larger volumes or small specialist supply batches.

Our in-house capabilities include:

Design for production services

CAD to CAM

Prototype machining

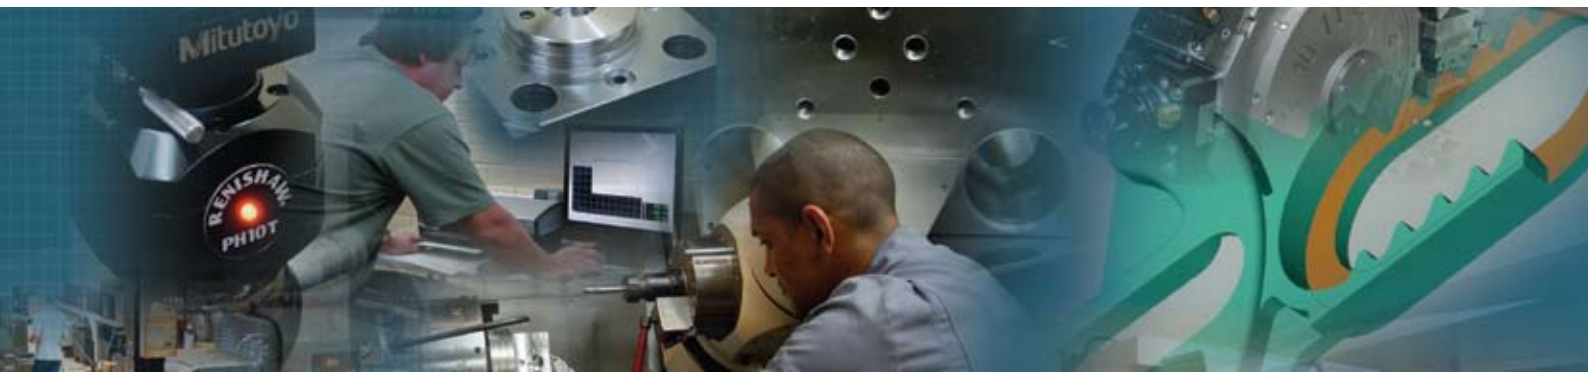

Pre-production and production

Consignment stockholding

Ability to provide specialist services such as heat treatment and plating.

Our policy of continuous investment ensures we have the most advanced technology to support any production machining operation with full traceability records.

Group capability

As a private group of engineering production businesses this ensures we have the capability to offer the management of larger projects covering a wide range of production requirements and to provide and co-ordinate specialist processes such as plating and heat treatment within a single source package.

Because of the installed capacity and willingness to invest, we are able to demonstrate a production service across the product life cycle from initial design and prototyping into small batch and ramped-up production. In addition, we can accommodate demand run-down and out of production spares requirements.

Materials knowledge

Stainless Steel
Aluminium
Brass
Mild Steel
Plastics
Titanium
Alloy Steel
Phosphor Bronze

Plant list

With a customer base that spans leading international names in the engineering sector, Rodmatic Limited has over 40 years of historical involvement and development of zero defect practices and on-time delivery regimes from an installed base of a wide range of the latest machine tools and support equipment.

- 1 Doosan Daewoo Puma MX 2000ST mill/turn centre
 - 1 Doosan Daewoo Lynx 220LI 3-axis lathe
 - 1 Doosan Daewoo Lynx 220LM 2-axis lathe
 - 1 Star SV-32 9-axis CNC sliding head auto
 - 1 Star ST-20RIII 7-axis CNC sliding head auto
 - 1 Hitachi Seiki HiTech Turn 20 SIII
 - 38 Multispindle automatic lathes
 - 1 Mitutoyo Crysta CMM
 - 1 TESA-SCAN non-contact measuring centre (SPC capable)
 - 1 Dürr 80C programmable cleaning system
- CAD to CAM with EdgeCAM part modeller and Solid Machinist, Delcam PartMaker SwissCAM
- Fully integrated scheduling and business management systems.
